# **Dual VPA Socket and USB Port Adapter Model: DVU-2**

# **Installation Sheet**

The DVU-2 is a Dual VPA Socket and USB Port Adapter. This unit can be mounted in two ways: Screw Mount and Velcro® Mount. Choose a mounting location that provides easy access and LED is clearly visible. Follow the diagrams below for proper installation.

### Mounting the Unit

#### **Screw Mount:**

The DVU-2 comes with flat head screws to facilitate mounting the unit to the dashboard or some other accessible area in the vehicle.

- 1. Attached the mounting tabs to the unit with the screws provided.
- 2. Once tabs are attached use remaining screws to mount unit in an accessible area.

#### **Velcro Mount:**

The DVU-2 comes with a Velcro pad for mounting the unit to the dashboard or some other accessible area in the vehicle.

- 1. Make sure the surface area on the unit where the Velcro will adhere to, and the surface you are adhering it to are clean.
- 2. Remove the backing on one side of the Velcro pad.
- 3. Apply the Velcro pad to specified area on the unit.
- 4. Remove the backing on the other side of the Velcro pad and then press the unit firmly into the designated mounting location.

## **Optional Hard Wiring**

#### **Hard Wiring:**

The DVU-2 VPA plug can be removed to allow for hard wiring of the unit when permanently installing it in a vehicle.

- 1. Cut off the VPA connector making sure to leave the appropriate length of cable to reach your connection point.
- 2. Connect the red stripped wire to a fused 20A power source.
- 3. Connect the black wire to chassis ground.
